

Cyber Shield Intelligence

Center of Excellence in
Cybersecurity and AI Solutions

Securing the Future. Intelligently.

Our Vision & Mission

To become the premier Center of Excellence in cybersecurity.

01

Our Leadership Team

Driven by visionary leaders with global impact and deep expertise.

04

Our Services

Advanced cybersecurity, research, strategy and intelligence solutions.

02

Call to Action

Secure your future with innovation, intelligence, and expert leadership.

05

Who We Serve

Trusted by governments, critical sectors, and global enterprises.

03

Conclusion

Thank you for choosing us; together, we build success.

06

Our Vision & Mission

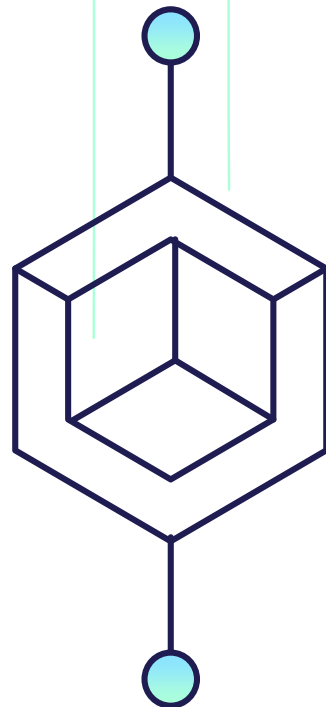

Empowering a Secure Digital World

Vision

To become the premier Center of Excellence in cybersecurity and AI across the region and beyond.

Mission

To deliver world-class expertise, innovation, and leadership in cybersecurity education, consulting, research, and solution development.

“Where intelligence meets protection.”

OUR SERVICES

What We Offer

Testing & Solutions Development

Our Testing & Solutions Development unit offers Penetration Testing, Ware Games, AI Programmable Robots, and more.

Specialized Training Programs

Our Specialized Training Programs deliver tailored, cutting-edge cybersecurity and AI courses by a world-class academic, technical team.

Research & Intelligence Unit

Our Research & Intelligence unit delivers academic and industrial research, intelligence reports, and impactful policy whitepapers.

Advisory & Consulting Services

Our Advisory & Consulting Services deliver tailored cybersecurity guidance, led by internationally recognized experts with unique expertise.

01

Testing & Solutions Development

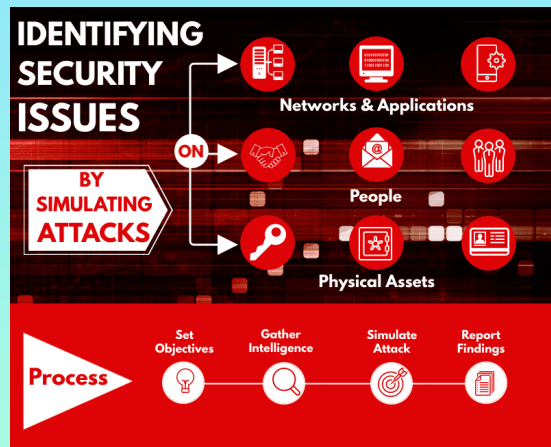

Solutions

Penetration Testing

We simulate real-world attacks through key phases, reconnaissance, exploitation, and reporting to uncover vulnerabilities. Our tests deliver actionable insights to strengthen defenses and ensure compliance.

Red Team Service

We perform full-scope simulated attacks to test defenses, response, and resilience against advanced threats. Covering planning, reconnaissance, exploitation, and post-engagement reporting to assess defenses and response readiness.

AI Programmable Robot

We develop AI-powered programmable robots capable of performing complex tasks autonomously, adapting to dynamic environments, learning from data, and enabling smart automation across industrial and operational applications.

02

Specialized Training Programs

Education

We provide more than **20** technical and high-level training that builds skills and knowledge, combining theory with hands-on practical labs for real-world expertise.

Artificial Intelligence

Hands-on AI training combining theory, practice, and skills.

Security Policy

Learn, implement, and enforce robust organizational security policies effectively.

Red Team

Simulated attacks training to identify and fix vulnerabilities.

Web Security

Identify and exploit vulnerabilities to secure web applications.

Cloud Security

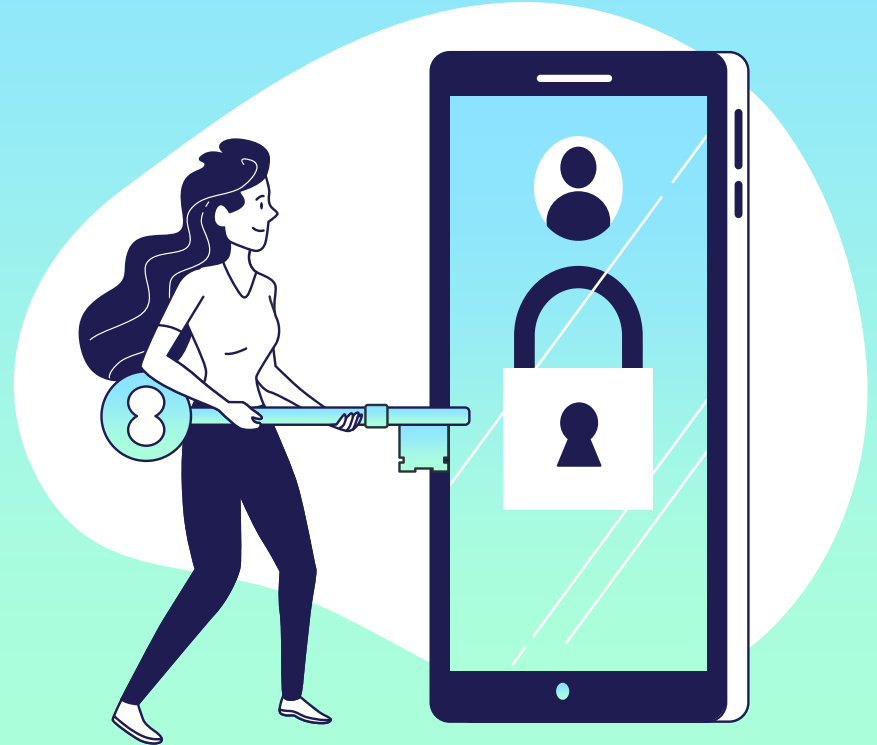

Protect cloud systems with secure practices and protocols.

Crisis Management

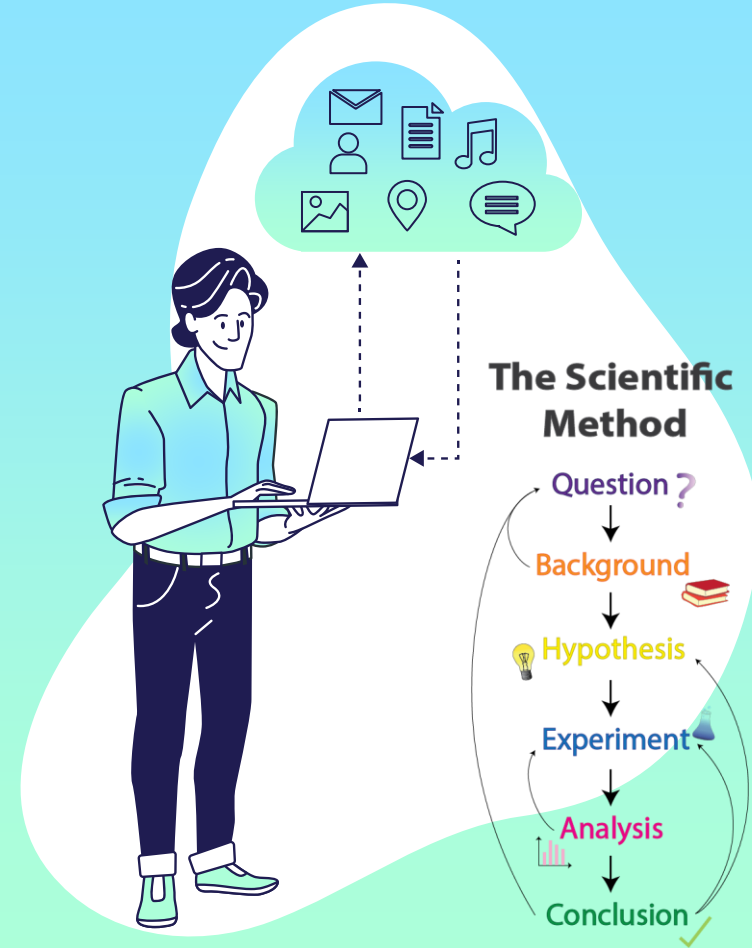

Train to handle emergencies, risks, and critical situations.

03

Research & Intelligence Unit

Our company is fully equipped to support organizations and educational institutions in conducting comprehensive scientific research. We provide end-to-end assistance, from designing and executing research projects to analyzing results. Additionally, we guide and mentor researchers on their own initiatives, offering expert advice, methodological support, and best practices to ensure high-quality, impactful outcomes.

04

Advisory & Consulting Services

Advisory

Security Frameworks and Policies

Advise organizations in building robust security frameworks and policies.

Security Budget Management

Advise organizations on planning and managing security budgets effectively.

Security Strategy and Governance

Advise organizations in building robust security frameworks and policies.

Who We Serve

Our Strategic Clients

Government agencies &
ministries

Critical infrastructure
operators

Private conglomerates &
holding groups

Financial institutions and
authorities

Healthcare, energy, and
transport sectors

Multinational corporations
with high data sensitivity

Our Leadership Team

Meet Our Founders & Advisors

"Led by experts with decades of field experience in national security, AI innovation, and enterprise cybersecurity."

Dr. Ernesto Damiani
CTO

A highly prestigious and internationally recognized expert in cybersecurity and AI, with global research leadership, awards, and prolific academic-industry contributions.

Dr. Chan Yeun
Advisor

A globally recognized cybersecurity expert with extensive international experience, academic leadership, prolific publications, and innovations across industry and research.

Dr. Luigi Martino
Advisor

An internationally recognized expert in cyber diplomacy and policy, with prestigious academic roles, global research leadership, and high-level institutional advisory positions.

Dr. Ahmed Y. Alhammadi
CEO

20+ years across federal and Abu Dhabi authorities, a Strategy Director with multisector expertise, international publications, and distinguished academic contributions.

Call to Action

Cyber Shield Intelligence

“At Cyber Shield Intelligence,
we don’t just follow the
standards. We define them.”
